

ROVENSO SA
Z.I du Vivier 22
1690 Villaz-St-Pierre
Switzerland

rovenso.com

ROVENSO is an EPFL startup, developing agile robots for security and safety monitoring of industrial sites.

We are a team of 7 people and we are looking for folks that are curious, not afraid of making mistakes, autonomous and collaborative, able to work with multiple priorities in a fast-paced, multi-cultural, multi-disciplinary environment

Every day, you will have the opportunity to innovate, experiment, share your ideas and contribute to solving the most challenging real-world robotics problems.

So join as

Full Stack Robotics Engineer

Starting date: As soon as possible

Your role:

- Design and implement the full robot-IoT architecture, from embedded data gathering, through database management, up to the User Interface
- Fully manage robot <> user connectivity and security
- Design, implement and maintain UIs for development, debug and demo purposes
- Test, debug, maintain, and document

Your profile:

You have 3+ years of experience in developing front + back-end solutions with strong interest in IoT

Your required skills:

- Strong understanding of Linux and IP networking
- Strong back-end development experience
- Firm understanding of IoT systems
- Firm understanding of cybersecurity
- Experience with frontend development
- Experience with video streaming (ffmpeg, gstreamer etc.)
- Familiarity with embedded hardware
